

EAGLE'S LESS THAN 2.7 pCi/L RADON MITIGATION WARRANTY

For: _____

The E.P.A. suggests an annual average in air radon level of 4 pCi/L in the lowest lived in area of a building. You should continue to look to the E.P.A. and state offices for any changes to the radon guidelines.

Eagle Environmental will reduce the in air radon levels in the basement (*excluding any radon contributed to the air through high radon concentrations from any well water*) to equal to or less than 2.7 pCi/L. We will provide you with a test kit from an E.P.A. certified radon testing laboratory which is to be placed by the homeowner or an independent party 48 hours after the system has been in operation. The kit is to be placed in accordance with the testing laboratories instructions and then sent to the laboratory by person administering the test. The homeowner and Eagle will receive a copy of the re-test results. Eagle will modify the system at no cost to the homeowner if the retest results are above 2.7 pCi/L. Eagle Environmental warrants that the radon level will stay below 2.7 pCi/L for the life of the structure as long as the fan Eagle installed is operating properly and as long as no structural changes to the foundation have been made to the building which was mitigated. This warranty is transferable to any new owners of the property mitigated.

Eagle recommends that the homeowner should do an annual retest with an E.P.A. certified test kit to verify that the system is operating properly and that the radon levels meet their goals. Eagle makes no guarantee or representation as to the health benefits of the reduction of radon levels in their home.

Eagle Environmental warrants that the materials and workmanship supplied by it shall be free from defects for a period of 5 years after completion. Eagle's responsibility under this Warranty shall be limited to the replacement of defective materials or the repairing of defective workmanship. **EAGLE MAKES NO EXPRESSED OR IMPLIED WARRANTY OR GUARANTEE AS TO THE MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OTHER THAN AS SET FORTH ABOVE.**
